E-MORRIS Training at the 2010 Network Services Conference
Orlando, FL -- June 22 - 24

We're doing something a little different at this year's Network Services conference. Instead of a generic demo, we'll be offering Agency-specific E-MORRIS training. This means we'll use your data and answer your questions. **We still have some times open (see below).**

You've placed orders and received invoices for Networx services. Now you want to know how to manage all that data! Join us for an E-MORRIS session using your own Networx billing and inventory data. We'll tailor this to your questions. Want to know how to track your active and archived inventory? We can show you that. Want to know how to manage your monthly billing data from summary to detail level? How to track disputes and adjustments? How to customize your queries? We'll show you all that too. Are you a DAR Administrator who wants to know how to manage user accounts? Just ask. Looking for a general overview? We can do that too, using your data. **Bring your account information (User ID and password) and your questions. Pre-registration required.**

Sessions will be 30 minutes each (see times below). We'll have two stations for each time slot. Each can accommodate 1 to 5 users from an Agency at a time.

To register, please send an email to fasbilling.help@gsa.gov and include the following information:

- **Name**
- **Agency**
- **AHC**
- **Email**
- **Phone**
- **Requested times (pick 3, in order of preference, from the list below)**
    - **Requested time 1**
    - **Requested time 2**
    - **Requested time 3**
- **Names of additional users for your session (up to 4 additional)**
